

Bottom view

Please note that the edge card pins are not displayed in this rendering.

Please note that the actual PCB thickness is very close to 1 mm.

Top view

For details regarding the physical dimensions of the card-edge connector, please refer to any suitable 52-pin card-edge connector datasheet. For example, the datasheet for part number 1775838-2 contains these drawings. These dimensions do not need to be considered as long as the dimensions listed in the "Carried board design" in the reference designs given in the MegaCard 5 documentation are followed.
